Subject: Application for the Junior Full-Stack Developer Engineer Position

Dear [Hiring Manager's Name],

I am writing to express my interest in the Full-Stack Developer Engineer position at [Company Name]. As a recent Computer Engineering graduate (October 2024) from the Higher Private School of Engineering and Technology in Tunis (ESPRIT), and with hands-on experience in building dynamic and scalable web applications, I am eager to contribute my skills to your team.

Currently, I am working at a Tunisian company called PLASTIFORM, where I am part of a development team responsible for creating a dynamic web platform. We use Spring Boot for the backend, React.js for the frontend, and MySQL as the database. This role has strengthened my practical knowledge in full-stack development and improved my collaboration skills within a multidisciplinary team.

Throughout my academic and professional journey, I have developed and deployed full-stack solutions using modern technologies. My final-year project involved creating two dynamic web applications with integrated DevOps pipelines, demonstrating my ability to handle complete software development cycles. My internships also provided me with experience in developing AI modules and data management tools.

I am particularly drawn to [Company Name] because of your focus on [specific company value or project], which resonates with my passion for delivering innovative and efficient solutions. I pride myself on being a proactive problem solver and a dedicated team player, ready to adapt to new challenges.

I would be delighted to discuss how my skills and experiences align with your needs. Please feel free to contact me at +216 55641516 or mohamedrassem.hammami1@gmail.com to schedule an interview.

Thank you for considering my application. I look forward to the opportunity to contribute to [Company Name]'s success.

Yours sincerely,
Mohamed Rassem Hammami
